

GEN 4.2 AIR NAVIGATION SERVICES CHARGES**1. Approach air navigation services****1.1 Principles**

Main following principles apply:

- A single unit rate is set per charging zone
- One charge is billed for each approach
- Charges take the Maximum Take Off Mass (MTOM) of aircraft into account
- Charges have to be paid by the aircraft operator. If the aircraft operator is unknown, the aircraft owner is debtor of the charge
- In case of non payment of the charges by the debtor, air navigation services may be denied

Two charging zones are defined:

- The category I gathers the aerodromes of Geneva and Zurich
- The category II gathers the aerodromes of Lugano, Bern-Belp, Grenchen, Les Eplatures, Sion, St. Gallen-Altenrhein and Buochs

Detailed principles applied are set by the Federal Ordinance on air navigation services which is available in the Swiss official languages on the following web site:

URL: <http://www.admin.ch/ch/f/rs/rs.html>

1.2 Category I: Zurich and Geneva

Until September 30th, valid charges per approach (VAT excl.) are available in annex 2.

As from October 1st, valid charges per approach (VAT excl.) are available in annex 1.

For information, they are calculated with following formula:

Unit rate x ((MTOM/50)^{0.65}) and following unit rate: CHF 360.07

A lump charge per MTOM in tons is granted to aircraft until 4.999 tons. The formula mentioned above is thus not applied for these flights.

VFR training flights

A lump charge per MTOM is billed for VFR training flights until 29.999 tons landing in Geneva. Beyond this MTOM, in Geneva, normal charges apply. In Zurich, normal charges apply for all training flights.

Definition of a VFR Training flight:

- Training flights must be attended or supervised by a flight instructor or inspector;
- Training flights are not commercial flights within the meaning of the aviation law and are not to be used for the purpose of carriage of passengers or goods
- Training flights within the aerodrome circuit are treated as training flights provided that the airport offers reduced landing charges for these flights.

Gliders

For powered gliders the ordinary approach charges are levied.

For instruction and training flights with towing aircraft and powered gliders the rate and the definition of "VFR training flights" are applicable.

Exempted flights

Following flights are exempted from approach charges:

a. Flights operated exclusively for the transport, on official mission, of following passengers:

- Reigning monarch and his immediate family
- Heads of State, heads of Government, and Government Ministers

In all cases, the exemption must be substantiated by the appropriate status indicator or remark on the flight plan.

b. Search and Rescue flights as defined in the corresponding Federal Ordinance.

c. Flights performed exclusively for the purpose of checking or testing equipment used or intended to be used as ground aids to air navigation, excluding positioning flights by the aircraft concerned.

1.3 Category II: Lugano, Bern-Belp, Grenchen, Les Eplatures, Sion, St. Gallen-Altenrhein and Buochs

Valid charges per approach (VAT excl.) are available in annex 2.

For information, they are calculated with following formula:

Unit rate x (MTOM^{0.65}) and following unit rate: CHF 31.24

A lump charge per MTOM in tons is granted to aircraft until 4.999 tons. The formula mentioned above is thus not applied for these flights.

VFR Training flights

A lump charge per MTOM is billed for VFR training flights until 29.999 tons. Beyond this MTOM, normal charges apply.

Definition of a VFR training flight:

- Training flights must be attended or supervised by a flight instructor or inspector;
- Training flights are not commercial flights within the meaning of the aviation law and are not to be used for the purpose of carriage of passengers or goods;
- Training flights within the aerodrome circuit are treated as training flights provided that the airport offers reduced landing charges for these flights.

Gliders

Towing aircraft are exempted from approach charges for approaches on following grass runways:

- Bern-Belp: Glider area
- Grenchen: Zone South for gliders
- St. Gallen-Altenrhein: Runway for gliders

For powered gliders, the ordinary approach charges are levied (exceptions: Bern-Belp glider area and in Grenchen zone South for gliders).

For instruction and training flights with towing aircraft and powered gliders the rate and the definition of "VFR training flights" are applicable.

Exempted flights

Following flights are exempted from approach charges:

- a. Flights operated exclusively for the transport, on official mission, of following passengers:
 - Reigning monarch and his immediate family
 - Heads of State, heads of Government, and Government MinistersIn all cases, the exemption must be substantiated by the appropriate status indicator or remark on the flight plan.
- b. Search and Rescue flights as defined in the corresponding Federal Ordinance.
- c. Flights performed exclusively for the purpose of checking or testing equipment used or intended to be used as ground aids to air navigation, excluding positioning flights by the aircraft concerned.

1.4 Billing and collection of approach charges

Skyguide has entrusted the local airport authorities with the billing and collection of the charges. Information concerning the billing and collection of approach charges may be obtained from the local airport authorities (flights billed) and/or from skyguide (tariffs).

2. En route air navigation services

2.1 Principles

Main following principles apply:

- The Swiss FIR constitutes a single charging zone
- A single unit rate is set for the Swiss charging zone
- Charges take the distance flown and the Maximum Take Off Mass (MTOM) of aircraft into account
- Charges have to be paid by the aircraft operator. If the aircraft operator is unknown, the aircraft owner is debtor of the charge
- In case of non payment of the charges by the debtor, air navigation services may be denied

As signatory of the Multilateral Agreement of 12th February 1981 relating to air navigation route charges, Switzerland is member of the Eurocontrol Organization and thus applies all related rules. Of particular interest for the user are the Conditions of application of the route charges system and conditions of payment which is available on the following web site:

URL: <http://www.eurocontrol.int/articles/reference-documents>

Detailed principles applied are also set by the Federal Ordinance on air navigation services which is available in the Swiss official languages on the following web site:

URL: <http://www.admin.ch/ch/f/rs/rs.html>

2.2 En route charges

The Swiss unit rate is set up in Swiss francs and is recalculated monthly in euro by applying the average monthly exchange rate between the EURO and the national currency for the month preceding the month during which the flight takes place.

The Swiss tariff is available on following web site:

URL: <http://www.eurocontrol.int/services/unit-rates-and-tariffs>

It is composed of a national unit rate to finance national air navigation services and of a regional administrative unit rate to finance the central billing and collection of charges at Eurocontrol level.

The exchange rate applied shall be that published in the Official Journal of the European Communities (Information and Notices). Where not indicated in the Official Journal, the exchange rate shall be calculated by reference on the one hand to the rate of exchange between the EURO and the dollar of the United States of America and, on the other hand, to the rate of exchange between the national currency concerned and the dollar of the United States of America as published by the International Monetary Fund in its "International Financial Statistics".

The data for the calculation of the charges are derived from the flight plan. Flight plans should be completed therefore in strict accordance with the ICAO instructions.

With regard to the conditions of payment of route charges the interest rate on late payment of route charges is published on Eurocontrol circulars:

URL: <http://www.eurocontrol.int/articles/information-circulars>

Exempted flights

Following flights are exempted from en route charges:

- Flights performed by aircraft of which the maximum takeoff mass authorized is less than two metric tons
- Mixed VFR/IFR flights in the charging zones where they are performed exclusively under VFR and where a charge is not levied for VFR flights
- Flights performed exclusively for the transport, on official mission, of the reigning Monarch and his immediate family, Heads of State, heads of Government, and Government Ministers; in all cases, the exemption must be substantiated by the appropriate status indicator or remark on the flight plan
- Search and rescue flights authorized according to the related Federal Ordinance
- Flights performed exclusively for the purpose of checking or testing equipment used or intended to be used as ground aids to air navigation, excluding positioning flights by the aircraft concerned
- VFR flights
- With the agreement of the Federal Department of Foreign Affairs and of the Swiss Air Force, FOCA exempts foreign military flights from route charges, on demand of the concerned state and under the condition of reciprocity
- Humanitarian flights

2.3 Billing and collection of route charges

The Federal Office for Civil Aviation has entrusted the EUROCONTROL Organisation with the billing and collection of the charges.

Post: EUROCONTROL
Central route charges office
